DIBt

Certification

In Germany, secondary containment products require national technical approval through the **DIBt** (**D**eutsches **I**nstitut für **B**au**t**echnik) in Berlin.

Products are tested to standard criteria, e.g. liquid capacity (measured to underside of platform), load limits, in order to obtain an approval. They must be manufactured using approved materials and method.

Jonesco's spill containment products are approved according to DIBt requirements by a recognised testing, inspection and certification body on behalf of DIBt. Copies of approval documents (in German) are available on request or online via the DIBt website.

All product platforms and bunds are **black** as standard. Some products require the use of central supports (*) which are a **natural colour** as standard.
