

BETTER SOLUTIONS + EXPANDED SERVICES

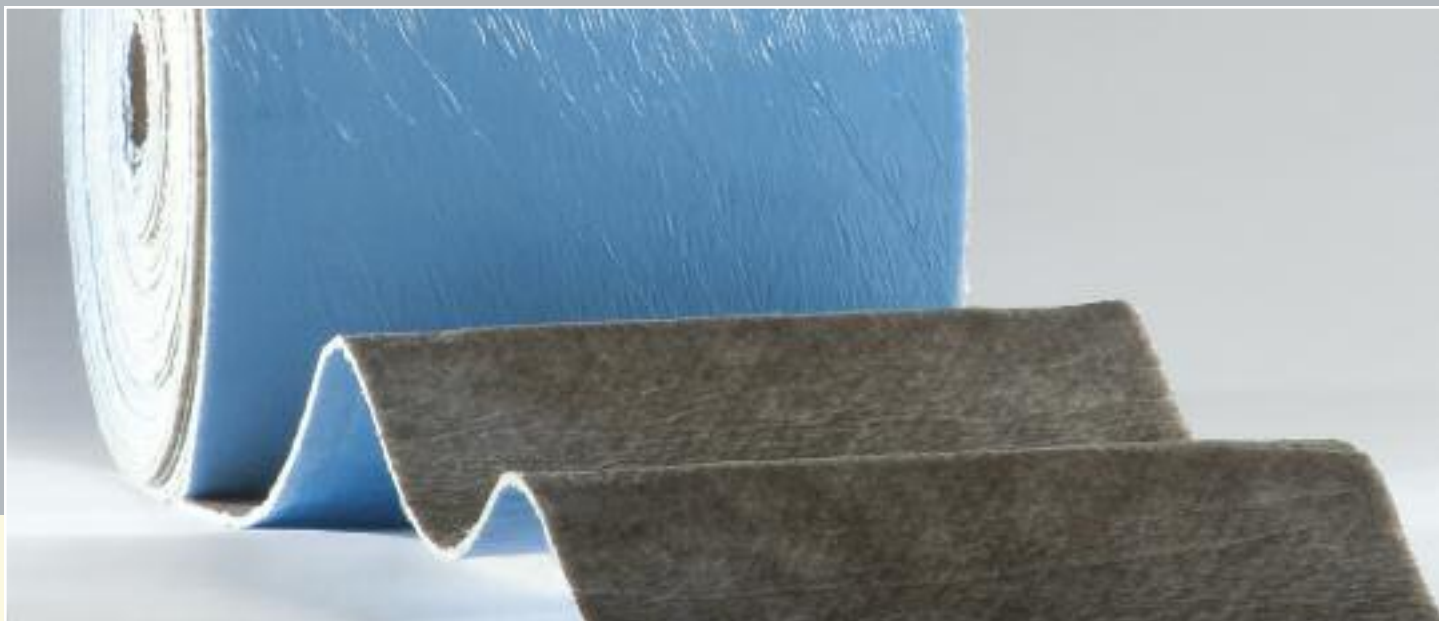

EVOLUTION SORBENT PRODUCTS

ESP: DELIVERING INNOVATIVE CUSTOMER SOLUTIONS

OUR FOCUS IS ON DEVELOPING AND MANUFACTURING INNOVATIVE, HIGH-PERFORMANCE PRODUCT SOLUTIONS THAT INCREASE THE COMPETITIVENESS OF OUR CUSTOMERS.

EVOLUTION SORBENT PRODUCTS, LLC, (ESP) produces standard-setting alternative high-performance sorbents and spill-control products as well as some of the very finest meltblown anywhere.

Our products are used around the world to handle some of the most demanding environmental, medical and filtration-industry challenges. We also supply a wide range of other sectors.

Operating 24/7, our state-of-the-art facility is located in Chicagoland – the geographic center of the U.S. Our network of regional distribution centers ensures fast delivery across the country.

RESEARCH MANUFACTURING MAINTENANCE TRANSPORTATION ENVIRONMENT

ESP TECHNOLOGIES

IN 2006, WE REALIZED THAT RISING OIL PRICES AND INCREASED ENVIRONMENTAL CONCERNS would create a need for less expensive, less oil-dependent alternatives to traditional meltblown. We developed the industry's first line of high-performance oil-only and universal natural recycled sorbents – **ColdForm2™**.

WHEN CUSTOMERS ASKED US FOR A SYNTHETIC HIGH-PERFORMANCE, OIL-ONLY ALTERNATIVE to meltblown with high recycled content, we responded with **Air Matrix™**.

THEN THE PACKAGING, TRANSPORTATION, FOOD AND MEDICAL SECTORS asked us for an MRO sorbent that wouldn't let liquid spills leak through to floors and other surfaces. We came back with **Ultraclean™ Poly-backed**.

THE DEMAND FOR A HIGH-PERFORMANCE, UNIVERSAL RECYCLED SYNTHETIC alternative to meltblown was met with the launch of **Ultraclean™ Industrial**.

THE MEDICAL SECTOR ASKED US TO MAKE A MEDICAL-GRADE ULTRA-HEAVY, RECYCLED UNIVERSAL PRODUCT THAT WAS WHITE.

We gave them **Ultraclean™ Pure** – a high-performance product used in operating rooms, on stretchers and as bed liners.

TO REDUCE SAFETY CONCERNS ABOUT HANDLING ABSORBED BIOMEDICAL and toxic fluids, we developed **SpillLock™**. It turns absorbed water-based spills such as blood, urine and other offensive fluids into a leak-resistant gel. This new technology also increases the absorbency of a number of our premium universal sorbent lines.

WHEN THE AIR FILTRATION INDUSTRY NEEDED EXCEPTIONALLY HIGH-QUALITY MELTBLOWN for use in air filters and medical-grade face masks, we put **our meltblown** through its paces and it exceeded expectations. They are using it today.

> **COLDFORM2™**

ESP's extensive flagship line of high-performance natural recycled oil-only and universal sorbents

> **AIR MATRIX™**

new oil-only premium recycled synthetic sorbents with high chemical and water resistance

> **ULTRACLEAN™**

new universal-only premium recycled synthetic sorbents offering high chemical resistance and equal oil and water absorbency

> **SPILLOCK™**

new technology added to products to increase absorbency by turning absorbed water-based liquids into a leak-resistant gel

> **MELTBLOWN**

an industry standard brought to new heights through ESP's state-of-the-art manufacturing technology and rigorous testing

> WE KNOW OUR CONTINUED SUCCESS DEPENDS ON HOW WELL WE PREDICT AND RESPOND TO CUSTOMER NEEDS. **Our promise: first-rate service and consistently high-quality products – all at a great price.**

ESP: EXPANDING SERVICES AND SALES SUPPORT

IN TODAY'S CHALLENGING TIMES, COMPANIES NEED MORE SERVICE, NOT LESS. WE RESPONDED BY INCREASING OUR INTERNAL SALES SUPPORT AND EXPANDING OUR NETWORK OF REGIONAL SALES AND DISTRIBUTION CENTERS.

Leading Service

We thrive on helping some of the most demanding customers in the world meet their operational goals. To ensure we provide the highest quality service, we increased customer support through three key initiatives:

1. strengthening our inside support team to dedicate a customer service representative (CSR) to each customer
2. expanding our regional sales teams to offer local services across the country
3. increasing our warehousing and distribution network to allow customers to order on an as-needed basis, reducing their overheads

Knowledgeable Customer Service Reps

When you call ESP, you speak to your own CSR – an experienced, knowledgeable person who learns your particular needs. Our CSR team knows sorbents inside out. They can help you select the best product for you.

Expert Sales Support

Located across the country, our regional sales staff understand sorbents. Draw on their expertise. They can help you with:

- training
- leads
- joint sales calls
- product samples
- sales support materials

Reducing Customer Overheads

Our 85,000 square-foot Chicago-area facility, which includes one of the largest inventories of spill-control products in the Midwest, supplies our cross-country distribution network. This makes for an easier purchasing cycle. You don't need to carry large inventories. That can make a big difference today in reducing your overhead costs.

Faster Shipping

Our Chicago manufacturing center operates 24/7. We maintain regional inventories across the country and 95% of orders are shipped within 24 hours. We also handle emergency shipping requests.

Distribution Network

Our expanded warehouse and support network includes hubs in:

- Atlanta
- Chicago
- Jackson
- Las Vegas
- Miami
- New York
- Seattle
- Toronto

ENSURING RELIABLE HIGH-QUALITY PRODUCTS

WE TAKE QUALITY CONTROL VERY SERIOUSLY. THAT'S WHY WE MAINTAIN FULL-TIME QC STAFF AND A DEDICATED IN-HOUSE TESTING LAB.

DEDICATED QUALITY CONTROL

High-performance products need ongoing expert quality control. All our products are measured against internationally accepted ASTM Test Method 726. We don't just test once, but continuously throughout production to ensure that our high standards are maintained. We also state our absorbencies in statistical averages.

Our commitment to quality control is the cornerstone of our research and continuous innovation. To maintain production of the highest quality products, we have:

- established dedicated quality control staff to monitor production daily
- created a permanent on-site lab dedicated to testing
- implemented the rigorous product standards required by medical and high-tech filtration customers

ESP SERVICES

> NO ORDER TOO SMALL

From a single bale to a full truckload, we'll ship what you need.

> SAME-DAY SHIPPING

We offer extensive same-day shipping through our expanding network of distribution centers.

> EXPERT SALES SUPPORT

Our experienced and knowledgeable CSR team and regional sales staff offer broad customer support.

> CUSTOM ORDERS

As a manufacturer, we can customize products to meet your specific needs.

> DROP SHIPMENTS

No need to even handle ESP products – we'll drop ship directly to your customers.

> PRIVATE LABELING

Want your name on our high-performance products? Ask about our private labeling program.

COLDFORM2™

NATURAL RECYCLED ALTERNATIVE

- > Made from recycled and renewable natural resources
- > Uses high-value, high-quality recycled materials
- > Reduces foreign-oil dependency
- > Out-performs meltblown
- > Delivers great value
- > Provides stable pricing

COLDFORM2™ IS ESP'S FLAGSHIP NATURAL HIGH-TECH SORBENT LINE. In 2006, the signs began emerging that rising oil prices would lead customers to look for an alternative to traditional meltblown sorbents. Meltblown, the traditional mainstay of the industry, was becoming too expensive.

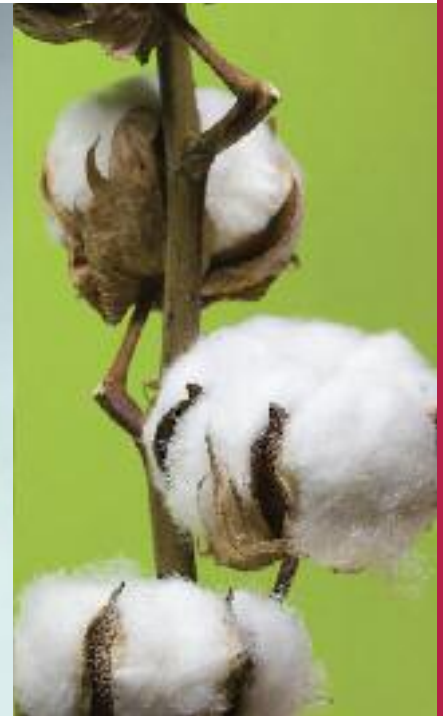

At ESP we recognized the need to develop a more cost-effective alternative. As a result, in 2007 we launched ColdForm™ – the industry's first high-performance oil-only and universal alternative sorbent.

Since that time, the line has undergone significant upgrades, making it now an industry standard. Now called ColdForm2™, it has grown to include four very different families – **Bonded Natural, Single-sided Laminated, Laminated and Fine Fiber** – offering sorbents for a range of applications.

ColdForm2™ provides more than price stability and a lower cost alternative to meltblown. It offers customers a less expensive and more effective solution while also reducing their dependence on oil-based products.

What Makes ColdForm2™ So Unique?

- 1. The majority of fibers used in ColdForm2™ are natural,** making it the most environmentally friendly product line in our offering.
- 2. It is the industry's first high-performance** oil-only and universal alternative sorbent.
- 3. It is made from high-quality, high-value natural and recycled materials** – not "recycled" virgin scraps from our floor.
- 4. It is offered in four different families** – Bonded Natural, Single-sided Laminated, Laminated and Fine Fiber.
- 5. ESP's unique SpillLock™ fibers** absorb up to 150 times their own weight in water-based spills.
- 6. We add high-tech, eco-friendly chemistry** to increase absorbency, strength and durability.
- 7. Extensive testing throughout the production process** ensures consistent quality.

EARTH-FRIENDLY

Key Upgrades to ColdForm2™

Increased water resistance:

- white oil-only offers far superior water resistance to most competing oil-only alternatives (3x more water resistant, in some cases, than the original version)

Improved web structure:

- now the value-priced uncovered pads and rolls are even more versatile

Expanded product line:

- ColdForm2™ socks, drum tops, universal land booms, pads and rolls can replace all your meltblown needs

Increased strength:

- means they stay on the job longer; they feel more substantial, too

Improved fire-retardancy technologies:

- entire line, including white oil-only, meets industry standards

Better looking:

- greater consistency in core color, most visible in uncovered universal products

Xtra weights available:

- 380 and 190 gsm weights available; all Xtra pads packaged in dispenser boxes

COLDFORM2™ BONDED NATURAL

A “natural” winner combining great performance with great price, these versatile pads and rolls are made with up to 97% natural fibers. Extremely soft and drapable, this product makes a great wiper. And in some cases, it is tough enough to be wrung out and reused.

KEY FEATURES

CF2 Bonded Natural White and Gray

- great performance, great price
- extremely soft and drapable
- consistent web structure
- available in heavy, medium and light weights

COLDFORM2™ BONDED NATURAL WHITE OIL-ONLY

are versatile pads made almost entirely of American-grown natural fibers. This makes them the ideal product when looking for the most environmentally responsible and economical sorbent.

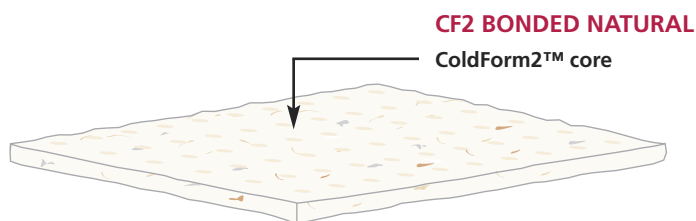

And they absorb up to 25% more oil and oil-based liquids than most comparable polypropylene sorbents.

These products are constructed from a single layer of extremely fine natural fibers that are point-bonded together, making them very soft. Their high loft, drapability and durability make them very versatile.

White oil-only pads and rolls are treated with our proprietary blend of additives to

maximize water repulsion, flame resistance and protection against molds and other microbes. What's more, they are:

- most earth-friendly of the ColdForm2™ families
- very strong when wet
- highly drapable and durable
- very effective in absorbing low-viscosity fluids such as diesel fuel

Applications

- great for maintenance and repair to avoid soaking up water or water-based fluids
- extremely effective in absorbing low-viscosity, oil-based fluids
- useful as a soft oil-absorbing wiper

COLDFORM2™ BONDED NATURAL GRAY UNIVERSAL is the

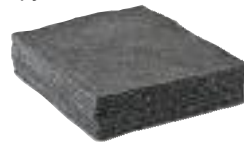

best go-to product for cleaning up any water- or oil-based spill. These natural, environmentally friendly products offer both great value and exceptional performance.

They're highly versatile. Because they are so drapable, they

can easily be folded or rolled into a sock and are soft enough to be used as a wiper. They fit easily into awkward spaces and around equipment and are strong enough – in some cases – to wring out and reuse. These products:

- absorb 30% more water-based fluids than comparable polypropylene sorbents
- offer great wet strength
- are soft and highly drapable

Applications

- general purpose sorbent to clean up any water- or oil-based spill
- useful as a soft wiper for delicate surfaces or personal hygiene
- can be wrapped around machinery to catch leaks
- effective as an absorbent of anti-freeze

COLDFORM2™ SINGLE-SIDED LAMINATED

A great low-lint, mid-range sorbent, this natural sorbent is the most popular of our ColdForm2™ families. It offers great strength along with many of the benefits of a double-sided laminate but at a lower cost. All of these pads and rolls are perforated for easy use.

KEY FEATURES

CF2 Single-sided Laminated White and Gray

- best all-round ColdForm2™ performer
- lower lint than Bonded Natural
- available in heavy, medium and light weights

COLDFORM2™ SINGLE-SIDED LAMINATED WHITE OIL-ONLY is so popular because it offers many of the benefits of the more expensive laminated product at a lower price.

It is manufactured by bonding a top cover of tough polypropylene spun bond to a high-loft, natural ColdForm2™ core. The spun-bond top cover reduces lint while increasing durability and UV protection.

The ColdForm2™ core ensures excellent performance – it absorbs 20% more oil and oil-based liquids than most comparable polypropylene sorbents.

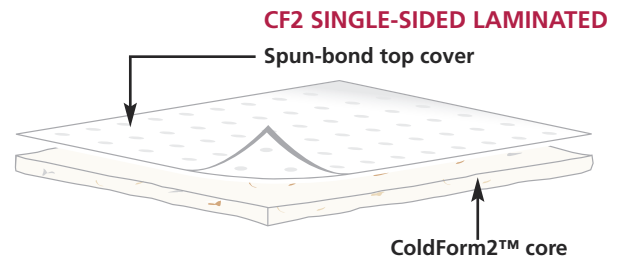

The exposed core material, when placed uncovered-side down on floors, provides greater traction or slip resistance than a double-sided laminated product.

Features of Single-sided Laminated – White Oil-only:

- earth-friendly, natural core
- less lint and greater strength than uncovered Bonded Natural
- less expensive than a double-sided laminate
- perforated for easy use

Applications

- ideal as a durable, low-lint, high-absorbency sorbent for oil-based leaks and spills
- effective when placed on floors core side down to reduce slip and increase safety
- great for outdoor maintenance or repair to avoid soaking up water or water-based fluids

CF2 SINGLE-SIDED LAMINATED - WHITE OIL-ONLY

CF2 Single-sided Laminated – WHITE OIL-ONLY

Heavy Weight 286 gsm:

Split Rolls	14" x 300'(36 cm x 91 m)	2	18	3CFWRSL-S

COLDFORM2™ SINGLE-SIDED LAMINATED UNIVERSAL is an excellent mid-range general purpose sorbent. It provides less linting and is stronger than Bonded Natural at a lower price than a double-sided laminated.

The absorbent natural core absorbs 20% more water- and oil-based liquids than most comparable polypropylene sorbents.

The tough spun-bond top cover offers UV protection and greater durability around sharp objects.

And if traction is a concern, single-sided is more slip-resistant than double-sided laminated.

Features of Single-sided Laminated – Gray Universal:

- tough top cover adds strength
- lower-lint benefits of laminated construction at a lower cost
- natural renewable materials
- perforated for easy use

Applications

- great for fast cleanups of oil- or water-based spills
- effective when placed on the floor core-side down to reduce slippage and increase safety
- ideal when a more lint-free product than Bonded Natural ColdForm2™ is needed
- camo-colored pads or rolls offer extra dirt-hiding protection

CF2 SINGLE-SIDED LAMINATED - GRAY UNIVERSAL

COLDFORM2™ LAMINATED

This natural high-performance sorbent is one of the toughest sorbents on the market. Abrasion-resistant sonic-bonded covers are laminated to the highly absorbent ColdForm2™ core. ESP's amazing SpillLock™ technology makes the gray universal a leak-resistant solution for water-based spills.

KEY FEATURES

CF2 Laminated White and Gray

- superior strength
- lint free
- SpillLock™ added to gray universal
- available in heavy weight only

COLDFORM2™ LAMINATED

WHITE OIL-ONLY is the strongest of the ColdForm2™ family. A premium MRO sorbent, it is more durable than most comparable meltblown sorbents.

Its double-sided spun-bond covers provide increased strength and durability – which means these products last longer on the job.

The spun-bond covers prevent virtually any linting from the core, making it a lint-free product.

This natural-fiber-based sorbent is more absorbent than most comparable polypropylene sorbents.

Features of ColdForm2™ Laminated – White Oil-only:

- extreme strength and abrasion resistance
- high water resistance
- high-loft core
- spun-bond top and bottom covers for UV protection
- dimpled
- a meltblown look-alike
- perforated for easy use

Applications

- effective when a virtually no-lint sorbent is needed
- good product when working around sharp objects due to its abrasion-resistant spun-bond covers
- ideal product for absorbing low viscosity liquids such as diesel fuel
- high durability makes it a good choice for high-traffic areas
- excellent UV protection built into the double spun-bond covers makes it a great choice for prolonged exposure to sunlight

COLDFORM2™ LAMINATED

GRAY UNIVERSAL is the strongest of the ColdForm2™ line and contains ESP's amazing new SpillLock™ technology. These are the go-to products for tough jobs and emergencies.

ESP's high-tech SpillLock™ technology turns absorbed water-based spills into a leak-resistant gel. This makes these sorbents ideal for cleaning up messy, offensive spills that should not be handled directly, such as flood water, blood or urine spills.

The double-sided spun-bond covers make this a virtually lint-free product. The covers also provide increased strength and durability

– which means these products last longer on the job – and seal in the fibers to prevent linting from the core.

Features of ColdForm2™ Laminated – Gray Universal:

- strongest of the ColdForm2™ family
- more absorbent than comparable polypropylene sorbents
- constructed with a high-loft core
- spun-bond top and bottom covers add UV protection
- dimpled
- a meltblown look-alike
- perforated for easy use

Applications

- use when you need a virtually no-lint sorbent
- excellent choice to clean up offensive and toxic spills because SpillLock™ turns absorbed water-based spills into a gel
- use when you need a durable sorbent to withstand some foot and forklift traffic
- use around sharp objects and equipment because it's very strong and durable

CF2 LAMINATED – GRAY UNIVERSAL

COLDFORM2™

FINE FIBER

The ultimate hybrid, these sorbents combine the best of ColdForm2™ and meltblown technologies. The highest quality fine-fiber polypropylene covers are bonded to an extremely absorbent ColdForm2™ core – making them a high-performance alternative to pure meltblown.

COLDFORM2™ FINE FIBER

WHITE OIL-ONLY is our ultimate white oil-only ColdForm2™ sorbent, offering superior wicking and liquid retention. It looks just like a meltblown fine fiber sorbent but it's more effective.

ColdForm2™ Fine Fiber absorbs 15% more oil and oil-based liquids than most polypropylene sorbents.

The top-of-the-line fine-fiber cover stock provides superior wicking and resistance to

abrasion and UV light. The inner core is made from high-absorbency natural and recycled materials.

Features of ColdForm2™ Fine Fiber – White Oil-only:

- dimpled
- a meltblown look-alike
- very low lint
- perforated for easy use

Applications

- excellent choice for outdoor MRO when you need a sorbent to withstand harsh conditions including prolonged exposure to UV light
- useful when you don't want to soak up water-based fluids just oil-based spills
- great outdoors to clean oily tools and machinery
- excellent for applications requiring superior wicking and liquid retention

CF2 FINE FIBER - WHITE OIL-ONLY

CF2 Fine Fiber – WHITE OIL-ONLY

Heavy Weight 286 gsm:

FORMAT	SIZE	UNITS/CASE	QTY/PALLET	ITEM #
Pads	16" x 18" (41 cm x 46 cm)	100	30	1CFWPF
Rolls	28" x 150' (71 cm x 46 m)	1	18	1CFWRF
Split Rolls	14" x 150' (36 cm x 46 m)	2	18	1CFWRF-S

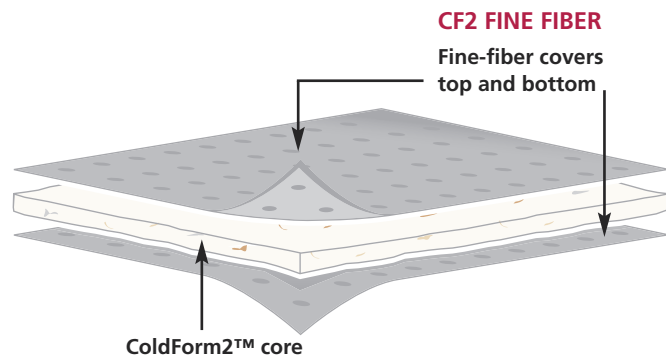

KEY FEATURES

CF2 Fine Fiber White and Gray

- best of meltblown and ColdForm2™
- fine-fiber covers offer superior wicking
- white oil-only is the most water-resistant
- gray universal contains SpillLock™
- available in heavy weight only

COLDFORM2™ FINE FIBER GRAY UNIVERSAL

is the finest ColdForm2™ all-purpose sorbent for maintenance and repair jobs.

It contains SpillLock™, which turns water-based spills into a leak-resistant gel. This amazing technology makes these sorbents the first choice when having to clean up offensive or messy spills that must not leak out of the pad.

ColdForm2™ Fine Fiber is more absorbent than polypropylene sorbents. The inner core is made from high-absorbency natural fibers.

Features of ColdForm2™ Fine Fiber – Gray Universal:

- top-of-the-line fine-fiber covers
- superior wicking
- UV resistance
- dimpled
- a meltblown look-alike
- perforated for easy use

Applications

- excellent choice for cleaning up spills such as blood, urine and storm-water that must not leak once the pad or roll is saturated
- useful when you need a premium MRO product with good absorbency and durability
- great for outdoor maintenance or repair when you need a product to withstand harsh conditions, including prolonged exposure to UV light

Split Rolls	14" x 150' (36 cm x 46 m)	2	18	1CFGRF-S

COLDFORM2™ XTRA

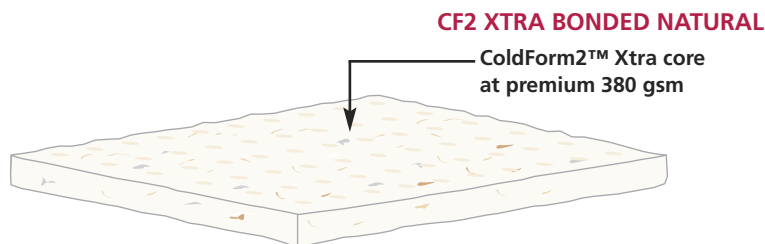

SUSTAINABILITY AT PREMIUM WEIGHTS

ColdForm2™ Xtra is the premium version of ColdForm2™. At 380 gsm for Xtra's heavy weight and 190 gsm for its light weight, ColdForm2™ Xtra is one of the heaviest premium sorbents available anywhere in North America. All CF2 Xtra pads are packaged in dispenser boxes.

KEY FEATURES

CF2 Xtra Bonded Natural:

- extra heavy weight 380 and 190 gsm
- all pads are boxed
- up to 95% recycled natural fibers
- more water-resistant than competing natural oil-only sorbents

COLDFORM2™ XTRA BONDED

NATURAL offers all the benefits of regular CF2 Bonded Natural but at extra heavy weights of 380 gsm for heavy weight and 190 gsm for light weight. It's a versatile top performer made from up to 95% American-grown natural renewable and recycled fibers.

Compared to other competing natural oil-only sorbents, CF2 Xtra offers significantly higher water resistance.

Made from a single layer of extremely fine, recycled and natural renewable fibers that are point-bonded together, it combines high loft, drapability and durability.

These soft and flexible sorbents fit easily around equipment and can be used as a sock. Often you can wring them out and reuse them.

ESP's proprietary blend of additives maximize water repulsion (in white oil-only), flame resistance and protection against molds and other microbes.

Split Rolls	14" x 300' (36 cm x 91 m)	2	18	3CFXGRB-S

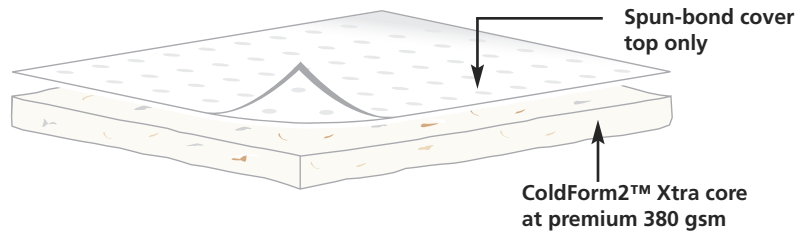

KEY FEATURES

CF2 Xtra Single-sided Laminated

- best all round CF2™ Xtra performer
- all pads are boxed
- up to 90% recycled natural fibers
- available in 380 and 190 gsm
- low lint, durable spun-bond cover

CF2 XTRA SINGLE-SIDED LAMINATED

COLDFORM2™ XTRA SINGLE-SIDED LAMINATED

delivers some of the best performance in the CF2 Xtra line. At weights of 380 and 190 gsm, this product combines great absorbency with premium weight.

It has a high-loft natural ColdForm2™ core topped with a single cover of strong

polypropylene spun bond. The high-loft core ensures excellent absorbency. The result is a tough, “go-to” sorbent that offers some of the lower lint, increased strength and UV protection of a double-sided laminate without the cost of the second cover.

When placed uncovered side down on floors, the exposed core material provides more traction or slip resistance than the double-sided laminated. Perforated for easy and exact use.

Split Rolls	14" x 300' (36 cm x 91 m)	2	18	3CFXGRSL-S

KEY FEATURES

CF2 Xtra Laminated:

- superior strength
- all pads are boxed
- lint free
- contains up to 89% recycled and renewable materials
- available in 380 and 190 gsm weights

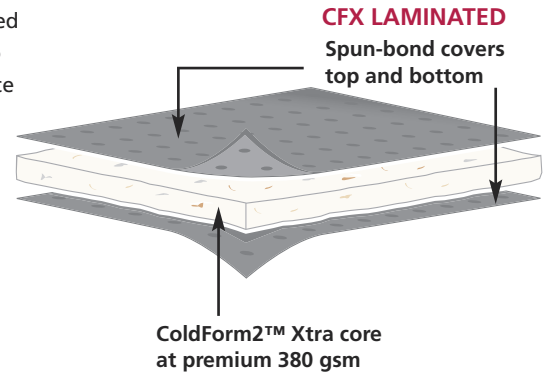

COLDFORM2™ XTRA LAMINATED is constructed with tough, spun-bond covers on both sides of a thick layer of highly absorbent ColdForm2™ Xtra core.

The result is a lint-free product that offers superior strength and lasts longer on the job.

The spun-bond covers also provide UV protection, which makes it an ideal product for outdoor use. Its superior strength allows it to stand up to jobs requiring the cleaning of sharp tools or equipment and even some foot traffic.

White oil-only pads and rolls are treated with our proprietary blend of additives to maximize water repulsion, flame resistance and protection against molds and other microbes.

Gray universal contains ESP's high-tech SpillLock™, which turns absorbed water-based spills into a leak-resistant gel. Perforated for easy use.

KEY FEATURES

CF2 Xtra Fine Fiber

- best of meltblown and ColdForm2™
- all pads are boxed
- available in 380 and 190 gsm weights
- fine-fiber covers offer superior wicking
- up to 76% recycled materials

COLDFORM2™ XTRA FINE FIBER brings together the best of both ColdForm2™ and meltblown technologies at premium weights. It combines a high-performance natural recycled ColdForm2™ core with polypropylene fine-fiber covers.

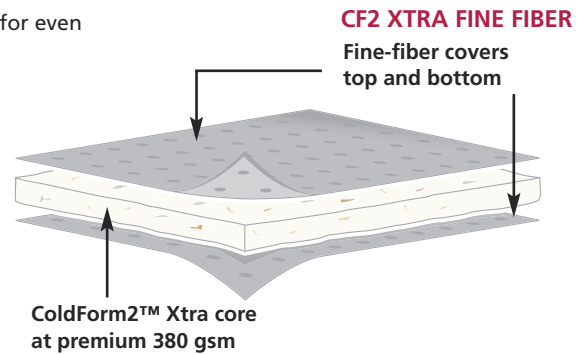

ColdForm2™ Fine Fiber looks almost identical to a traditional meltblown but works much harder. The fine-fiber cover stock provides superior wicking.

The ColdForm2™ Xtra core contains renewable and recycled fibers and provides high-performance absorbency. The fine-fiber

covers give additional surface area for even more absorption.

White oil-only pads and rolls are treated to maximize water repulsion, flame resistance and protection against molds and other microbes.

Gray universal contains ESP's high-tech SpillLock™, which turns absorbed water-based spills into a leak-resistant gel.

AIR MATRIX™

PREMIUM OIL-ONLY RECYCLED

- > Premium quality oil-only synthetic
- > Uses only high-value, high-quality recycled synthetic materials
- > Superior strength laminated
- > Virtually lint free
- > Very drapable, extremely soft
- > Exceptional oil absorbency

AIR MATRIX™ IS ESP'S NEW PREMIUM OIL-ONLY SYNTHETIC RECYCLED SORBENT LINE. It is designed to offer a synthetic alternative to natural recycled oil-only ColdForm2™. Air Matrix™ is an oil-only product made from 100% premium recycled polypropylene.

Oil-only Air Matrix™, combined with its universal recycled partner Ultraclean™, offers customers a new high-tech synthetic alternative to earth-friendly natural ColdForm2™ and traditional meltblown.

Its unique features set it apart from other competing products. Air Matrix™ – White Oil-only features include:

- exceptionally high water and chemical resistance
- superior liquid retention compared with competing products

The high-quality recycled materials used, combined with ESP's unique manufacturing process, make this product an extremely high-capacity sorbent. It is also exceptionally soft and drapable.

AM LAMINATED - WHITE OIL-ONLY

AM Laminated – WHITE OIL-ONLY

Heavy Weight 286 gsm:

FORMAT	SIZE	UNITS/CASE	QTY/PALLET	ITEM #
Pads	16" x 18" (41 cm x 46 cm)	100	36	1AMWPL
Rolls	28" x 150' (71 cm x 46 m)	1	18	1AMWRL
Split Rolls	14" x 150' (36 cm x 46 m)	2	18	1AMWRL-S

KEY FEATURES

Air Matrix™

Laminated and Laminated Xtra:

- high oil absorption
- good strength and durability
- softness and drapability
- exceptional chemical resistance
- high recycled polypropylene content
- available in Xtra 380 and 286 gsm weights

AIR MATRIX™ LAMINATED OIL-ONLY

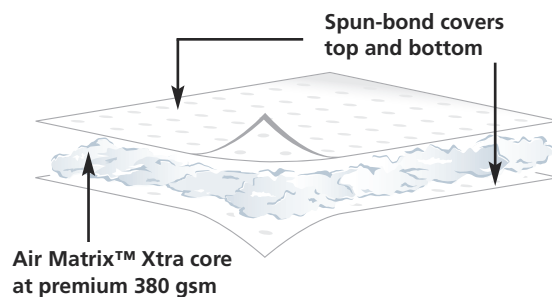

is a premium, 100% polypropylene oil-only sorbent. This very soft and durable product resists water but quickly absorbs oil-based fluids including oils, gasoline, kerosene and diesel fuel.

Tough, spun-bond top and bottom covers reduce lint and increase durability. Air-laid construction creates a consistent, extra strong, highly absorbent internal web structure.

Air Matrix™ contains recycled premium polypropylene (not pulverized scrap). We use only ultra-long poly recycled fibers. That makes Air Matrix™ stronger and more absorbent than industry-standard recycled products made from pulverized polypropylene scrap.

It is available in Xtra heavy (380 gsm) and heavy (286 gsm) weights.

AM XTRA LAMINATED

Applications

- flexible, drapable nature makes it a great choice for wrapping around equipment and catching drips in hard-to-reach places
- low lint and tough laminate covers make it ideal for wiping
- useful around sharp objects and equipment when a high capacity polypropylene sorbent is required
- great choice when working in marine environments

AM XTRA LAMINATED - WHITE OIL-ONLY

ULTRACLEAN™ PREMIUM UNIVERSAL RECYCLED

- > Premium quality universal synthetic
- > Superior strength, lint-free laminated
- > Low-slip poly-backed laminated
- > Good chemical resistance
- > High-tech white universal offers extremely high capacity

ULTRACLEAN™ PREMIUM SYNTHETIC RECYCLED is an amazing new universal product line that outperforms virtually all classic meltblown sorbents. Made from a blend of recycled synthetic fibers, Ultraclean™ has a smooth, undimpled surface. This universal laminated sorbent is engineered to provide balanced performance, absorbing oil and water equally.

It also contains SpillLock™, which absorbs 150 times its weight and turns absorbed water-based spills into a leak-resistant gel.

Available in a choice of three lines:

- Poly-backed Industrial Laminated
- Industrial Laminated
- Xtra Pure Laminated – White Universal

ULTRACLEAN™ POLY-BACKED INDUSTRIAL

ULTRACLEAN™ POLY-BACKED INDUSTRIAL GRAY UNIVERSAL

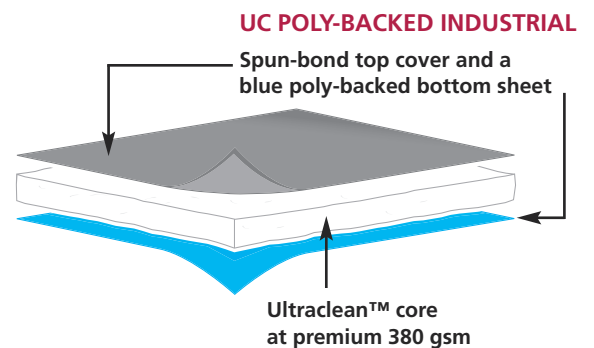

These laminated pads and rolls combine a very high recycled content – 72% – with super absorbency. They contain ESP's unique SpillLock™ fiber technology, which absorbs 150 times its own weight in water-based liquids. Pads and rolls are not perforated to increase leak-resistance.

Ultraclean™ Poly-backed Industrial offers:

- blue low-slip poly-backing to prevent leak through
- gray, polypropylene spun-bond top sheet to reduce lint and increase strength
- high-capacity absorbency
- SpillLock™ to increase absorbency
- great durability so it can stay on the job longer

Application

- useful when you need to protect the floor below from the absorbed spills
- great for most indoor MRO applications
- effective to protect surfaces in spray booths
- low-slip rolls protect floors and can be used as an absorbent alternative to needle punch and rag rug

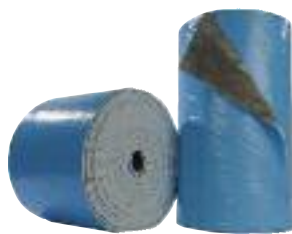

KEY FEATURES

Ultraclean™ Poly-backed Industrial:

- premium medical-quality low-slip backing keeps absorbed liquids from penetrating to floors or surfaces below
- superior strength
- with SpillLock™
- up to 72% recycled synthetic fibers
- available in 380 and 190 gsm

ULTRACLEAN™ INDUSTRIAL

This universal recycled synthetic offers an extremely absorbent Ultraclean™ core wrapped in tough spun-bond covers. It is used for high-performance applications and is made from the highest quality recycled synthetic fibers.

KEY FEATURES

Ultraclean™ Industrial Laminated:

- superior strength
- high chemical resistance
- contains SpillLock™
- up to 80% recycled synthetic
- easy to wrap and fold
- available in 380 and 190 gsm
- pads and rolls are perforated

ULTRACLEAN™ INDUSTRIAL GRAY UNIVERSAL

is a premium high-tech synthetic absorbent that combines a high recycled fiber content with excellent absorption capabilities.

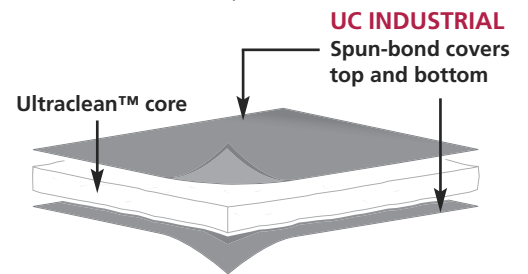

Universal pads absorb oil- and water-based fluids such as cutting oils. They also contain SpillLock™, which absorbs 150 times its own weight in aqueous-based liquids.

Strong gray polypropylene spun-bond top and bottom covers reduce lint and increase strength.

Applications

- excellent choice for MRO maintenance with good UV protection
- great choice for both durability and high absorption
- specifically optimized for low viscosity water-based liquids

ULTRACLEAN™ PURE

ULTRACLEAN™

Breaking the color code, these exceptionally high-performing sorbents are white but universal in application. Superior quality and with extra-heavy 440 gsm weight, they meet medical standards. The “Pure” is made from 84% recycled high-quality synthetic fibers.

KEY FEATURES

Ultraclean™ Pure Laminated :

- medical grade
- very high capacity (absorbency)
- with SpillLock™
- recycled synthetic
- easy to wrap and fold
- custom sizes available
- available in Xtra 440 and 220 gsm

ULTRACLEAN™ XTRA PURE WHITE UNIVERSAL is specifically designed for medical and clean-room applications that demand exceptionally high performance.

Ultraclean™ Pure has a smooth, undimpled surface. Made from a blend of recycled synthetic fibers, these thick, pure

white pads and rolls are soft and drapable. Top and bottom spun-bond covers make them lint-free and very strong.

This is a universal sorbent engineered to provide carefully balanced performance – absorbing oil and water equally.

Ultraclean™ also contains SpillLock™, which absorbs 150 times its weight in water-based liquids and turns absorbed spills into a leak-resistant gel. It is available in Xtra heavy (440 gsm) and Xtra light (220 gsm) weights.

Applications

- super heavy weight and high absorbency make it ideal for the operating room
- lighter weight is ideal for bed liners or stretcher liners
- very soft, lint-free qualities makes it suitable for clean rooms and for use as a personal hygiene product

UC XTRA PURE LAMINATED - WHITE UNIVERSAL

MELTBLOWN

CLASSIC 100% POLYPROPYLENE

- > Highest quality polypropylene
- > Used in environmental, medical and air filtration applications
- > Range of weights and formats
- > State-of-the-art Exxon technology
- > High loft boosts absorbency
- > Ongoing QC throughout production guarantees consistent quality

AT ESP, WE KNOW THAT ALL MELTBLOWN IS NOT CREATED EQUAL. There are a couple of very different technologies used to manufacture this industry mainstay. Exxon Technology is, by far, the superior system and is considered the industry standard for meltblown. At ESP, we use this technology exclusively.

While meltblown (polypropylene) sorbents produced by various manufacturers may all look quite similar, they are not. Just as with cars, they all perform differently. Take a high-end sports car for example and compare its performance to that of a mini van. There's a big difference.

At ESP, we like to think we produce the sports cars of the **sorbent industry**. Pound for pound, our products almost always outperform other technologies by a significant margin.

Our modern meltblown production lines produce very fine fibers. For meltblown, it's all about the size and consistency of the fibers combined with "high loft" or air space around the fibers.

In fact our meltblown lines are so high-tech that we are also able to manufacture products for the extremely exacting medical and air filtration industries. And that same technology and quality goes into every one of our meltblown sorbents.

What Makes ESP's Meltblown So Unique?

- 1. Highest Absorbency:** Pound for pound ESP meltblown offers some of the highest absorbency in the market.
- 2. Super Water-resistant White:** Our oil-only meltblown absorbs virtually no water.
- 3. High Loft:** Exceptionally high loft means greater absorbency.
- 4. Consistently High Quality:** Quality Control testing throughout production ensures premium quality.
- 5. High UV Resistance:** This makes them excellent in outdoor applications.
- 5. Three Families:** Available in three distinct lines and a range of weights:
 - Sonic Bonded
 - Laminated
 - Fine Fiber

ESP Meltblown - Setting the “Gold Standard”

Protecting the environment, filtering the air and responding to hazardous spills

WHEN IT COMES TO ENVIRONMENTAL PROTECTION, often only the best will get the job done. ESP’s meltblown sorbents, especially our booms and sweeps, have found a place on the front lines of the century’s worst environmental disaster. Not only highly effective and absorbent, they are also strong and withstand some very tough conditions. Meltblown sorbents are the best products for absorbing spills on lakes and oceans.

OUR ULTRA-MODERN EQUIPMENT AND ONGOING QUALITY CONTROL SYSTEMS ensure that our meltblown meets the exacting standards demanded by the medical and air-filtration sectors. That expertise is also built into each of our meltblown sorbent products.

OUR YELLOW HAZMAT SORBENTS ARE THE MOST CHEMICALLY RESISTANT of our sorbents. Of all our lines, our meltblown HazMat sorbents stand up the very best to aggressive chemicals.

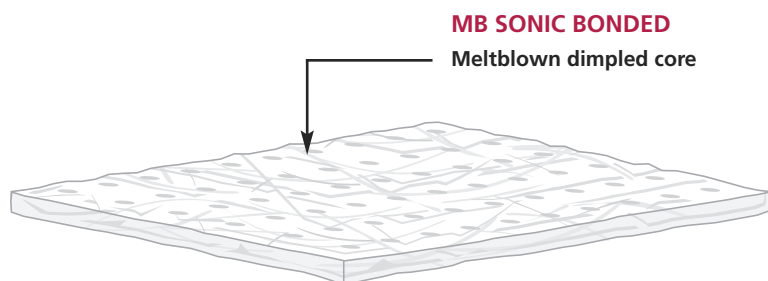

MELTBLOWN SONIC BONDED

This mainstay of the sorbent industry offers greater strength and less linting than plain polypropylene meltblown. ESP's Meltblown Sonic Bonded delivers reliable absorbency at an economical price.

KEY FEATURES

MB Sonic Bonded White and Gray

- dimpled
- all pads and rolls are perforated
- economical
- stronger and less lint than plain meltblown
- available in heavy, medium and light weights

MELTBLOWN SONIC BONDED WHITE OIL-ONLY

sorbents are constructed from a single layer of high quality, uniform polypropylene fibers "sonically" bonded together. This bonding process creates dimples that add strength and reduce linting.

These versatile pads and rolls combine high loft with drapability. Pound for pound, Meltblown Sonic Bonded offers the greatest absorbency of the meltblown family.

All pads are perforated through the center and all rolls are perforated lengthwise and across the roll.

White oil-only pads and rolls are available in a variety of weights.

Applications

- great for clean-up of large oil spills
- ideal solution for marine spill clean-up
- excellent go-to product for outdoor MRO

MELTBLOWN SONIC BONDED GRAY UNIVERSAL pads and rolls are proven performers for cleaning up just about any kind of liquid spill. The most cost-effective sorbents in the meltblown family, they offer both great value and reliable performance.

All pads are perforated through the center and all rolls are perforated lengthwise and across the roll.

They are available in heavy, medium and light weights.

Applications

- general purpose sorbent for oil- or water-based spills
- most cost-effective sorbent in the meltblown family
- ideal product for lighter duty indoor MRO applications

MELTBLOWN LAMINATED

If the job demands a soft, lint-free, durable meltblown sorbent, our meltblown laminated pads and rolls are the answer. Strong spun-bond covers resist rips and abrasions, even when soaked.

KEY FEATURES

MB Laminated White and Gray

- strongest of the meltblown family
- lint-free
- tear resistant
- UV protection
- available in heavy and medium weights; camo in heavy weight only

MELTBLOWN LAMINATED

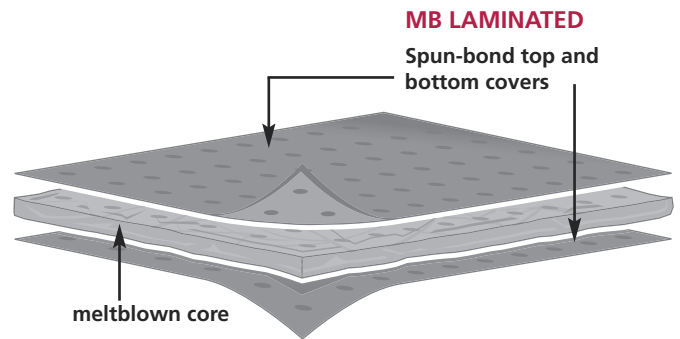

WHITE OIL-ONLY pads and rolls are constructed by ultra-sonically fusing outer layers of durable polypropylene spun bond to a high-loft meltblown center.

The spun-bond covers provide increased strength, which helps them last longer and reduces costs. The covers seal in the fibers to prevent any linting from the core. They also provide the UV protection needed for extended outdoor use.

White oil-only pads and rolls are treated with our proprietary blend of additives to

maximize water repulsion.

All pads are perforated through the center and rolls are perforated both lengthwise and across the roll. Available in heavy and medium weights.

Applications

- use when an oil-only sorbent with durability is needed
- ideal product for wiping sharp tools and equipment
- withstands moderate foot and forklift traffic in an oil-only environment
- excellent UV protection built into the double spun-bond covers makes it a great choice for prolonged exposure to sunlight

MELTBLOWN LAMINATED GRAY UNIVERSAL pads and rolls are covered with a top and bottom layer of spun bond. These universal sorbents will absorb any water- or oil-based leak or spill.

They are very strong and may withstand sharp equipment and even some foot traffic. Their spun-bond covers make them virtually lint free.

All pads are perforated through the center and rolls are perforated both lengthwise and across the roll.

Meltblown Laminated – Gray Universal is available in both camo (camouflage pattern to hide dirt and stains) and gray universal. Camo is available in heavy weight. Gray is available in both heavy and medium weights.

Applications

- durable product for indoor usage when a sorbent must withstand some foot and forklift traffic
- great for lining spray booths when a lint-free product is required

MELTBLOWN FINE FIBER

Precision-engineered and manufactured using state-of-the-art Exxon technologies to maximize loft and absorbency, our premium-grade Meltblown Fine Fiber sorbents offer great absorbency and fast wicking.

KEY FEATURES

MB Fine Fiber White and Gray

- highly absorbent
- premium fine-fiber covers
- fast wicking
- low lint
- available in heavy, medium and light weights

MELTBLOWN FINE FIBER

WHITE OIL-ONLY pads and rolls are the most versatile of our meltblown family. The meltblown core is wrapped with premium quality fine-fiber covers made using small diameter densely woven polypropylene fibers. These covers are then ultrasonically bonded to a high-loft meltblown core. They are manufactured to maximize loft, durability and absorbency.

The result is a high-quality low-lint sorbent with durable outer covers that are fast wicking and low lint.

All pads are perforated through the center and the rolls are perforated both lengthwise and across of the roll. Available in heavy, medium and light weights.

Applications

- excellent choice when a meltblown with low lint and good durability is required
- use this when the best MRO meltblown sorbent that won't soak up water or water-based fluids is needed
- use it outdoors when a low-lint product with good durability is required

MELTBLOWN FINE FIBER GRAY UNIVERSAL sorbents, like all our meltblown products, are made from the purest and highest quality American-made polypropylene.

The top-of-the-line fine-fiber cover stock provides low lint and superior wicking. The inner core is made from high-loft polypropylene fibers that absorb liquids quickly.

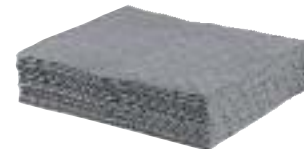

All pads are perforated through the center and rolls are perforated both

lengthwise and across the roll. They are available in heavy, medium and light weights.

Applications

- excellent choice for general purpose clean-up when you need a meltblown product with low lint and good durability
- quickly absorbs any liquid – oils, solvents, coolants, water – from leaks or spills
- great for catching overspray

MELTBLOWN XTRA

PREMIUM QUALITY AT THE HEAVIEST WEIGHTS

Meltblown Xtra is the premium version of ESP's meltblown line. At 380 gsm for Xtra's heavy weight and 190 gsm for its light weight, Meltblown Xtra is one of the heaviest premium polypropylene sorbents available. All Xtra pads are packed in a dispenser box.

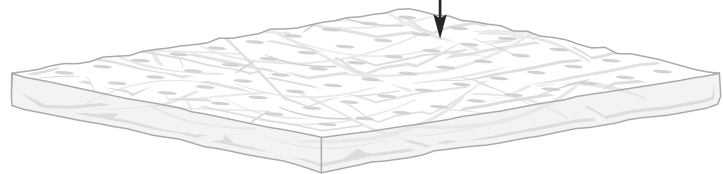

KEY FEATURES

MB Xtra Sonic Bonded:

- available in Xtra 380 and 190 gsm weights
- all pads are packaged in dispenser boxes
- versatile
- higher capacity absorbency than standard meltblown

MB XTRA SONIC BONDED

ColdForm2™ Xtra core at premium 380 gsm

MELTBLOWN XTRA

SONIC BONDED pads and rolls have the same great qualities as our standard meltblown sonic bonded but the additional thickness and weight means they can absorb more liquid.

They stay on the job longer so they don't need to be replaced as often. That saves you time and money.

These pads and rolls are constructed from high quality, American-made uniform polypropylene fibers sonically bonded

together. This bonding process creates dimples that add strength and reduce linting.

Meltblown Xtra Sonic Bonded White Oil-only products can float on water and quickly absorb oil-based leaks and spills. That makes

them ideal for outdoor maintenance and repair when you want to avoid soaking up water or water-based fluids.

MB XTRA SONIC BONDED - WHITE OIL-ONLY

Meltblown Xtra Sonic Bonded Gray Universal pads and rolls absorb any water- or oil-based spill. They are an excellent choice when you need higher absorbency than the regular meltblown sonic bonded pads and rolls.

All Xtra Sonic Bonded pads are perforated through the center and rolls are perforated lengthwise and across the roll.

Both the white oil-only and gray universal pads and rolls are available in Xtra heavy (380 gsm) and light (190 gsm) weights.

KEY FEATURES

MB Xtra Laminated:

- superior strength
- lint free
- available in Xtra heavy 380 gsm and Xtra light 190 gsm weights
- all pads are boxed

MELTBLOWN XTRA LAMINATED has tough, spun-bond covers on both sides of an extra thick layer of highly absorbent polypropylene fibers.

The result is a super-weight lint-free product that offers superior strength and lasts longer on the job. It is tough enough to withstand sharp tools and equipment.

The spun-bond covers also provide UV protection. This makes it an ideal product for outdoor use.

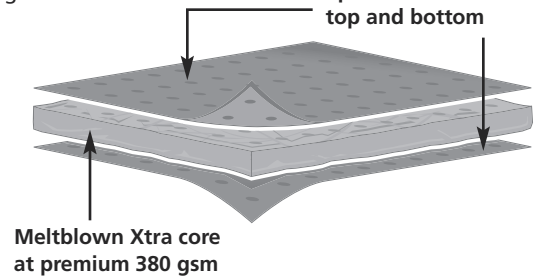

White oil-only pads and rolls are very strong and resistant to UV light, making them excellent for outdoor MRO.

Gray universal products absorb both oil- and water-based liquids, making them an excellent all-purpose product.

They are available in heavy (380 gsm) and light (190 gsm) weights. Perforated for easy use.

KEY FEATURES

MB Xtra Fine Fiber

- premium fine-fiber covers
- most absorbent meltblown product
- high loft
- all pads are boxed

MELTBLOWN XTRA FINE FIBER takes classic sorbent technologies to new heights of performance. It combines premium meltblown fine-fiber covers with a super-heavy-weight core.

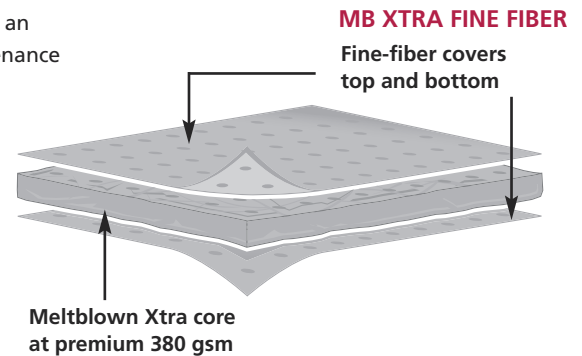

The fine-fiber cover stock provides superior wicking and resistance to abrasion. The dimpled covers provide additional surface area for even more absorption.

The inner core is made from high-loft polypropylene fibers that absorb liquids quickly.

White oil-only pads and rolls are an excellent choice for outdoor maintenance tasks. Because they won't absorb water, they stay on the job longer. Their fine-fiber covers make them strong enough to withstand sharp equipment.

The gray universal will absorb both oil- and water-based spills.

They are available in 380 and 190 gsm weights and are perforated for easy use.

2. HAZMAT SORBENTS

COLOR CODED FOR SAFETY

Yellow is universally used to signal safety and caution. The bright yellow color used in our HazMat sorbents makes them easier to locate in an emergency and warns that hazardous liquids may be absorbed in the product.

LEAKING OR SPILLED HAZARDOUS CHEMICALS

put people, the environment and buildings at risk. These dangerous fluids can cause serious personal injury if they contact skin, are inhaled or accidentally swallowed.

Alone or combined with certain materials, they may cause fires and even explode. Fast, effective clean-up is critical not only for safety's sake but for compliance with a growing number of local, state and federal regulations.

Because aggressive chemical spills require tough, inert products that can withstand chemicals, ESP's HazMat sorbents are made with the highest quality 100% poly meltblown.

Use these yellow products for safe clean-up of unknown, toxic, flammable, corrosive and aggressive chemical liquid spills. Use them any time there's a spill of an unknown liquid.

This HazMat section includes the following products:

- Sonic Bonded Yellow Pads and Rolls
- Fine Fiber Yellow Pads and Rolls
- Yellow Socks in various lengths
- Yellow Pillows and Pans
- Yellow Particulate

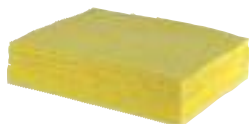

• pads and rolls • socks • pillows • pans • particulate

For a full selection of **YELLOW HAZMAT SPILL KITS**, see our Spill Kit section on page 44.

HAZMAT PADS AND ROLLS

YELLOW HAZMAT MELTBLOWN SONIC BONDED pads and rolls offer a low-lint solution for cleaning up aggressive chemical or unknown spills. They are available in heavy, medium and light weights. All pads are perforated through the center. Rolls are perforated lengthwise and across the roll, allowing for easy and exact use.

MB Sonic Bonded – YELLOW HAZMAT

Heavy Weight 286 gsm:

FORMAT	SIZE	UNITS/CASE	QTY/PALLET	ITEM #
Pads	16" x 20" (41 cm x 51 cm)	100	30	1MBYPB1620

HAZMAT PADS AND ROLLS (CONTINUED)

YELLOW HAZMAT MELTBLOWN FINE FIBER pads and rolls are constructed with highly absorbent premium fine-fiber covers over a meltblown core. They are available in heavy, medium and light weights.

All pads are perforated through the center. Rolls are perforated lengthwise and across the roll, allowing for easy and exact use.

MB Fine Fiber – YELLOW HAZMAT

Socks	3" x 16' (8 cm x 5 m)	10	20	10YS316

HAZMAT PILLOWS AND PANS

YELLOW HAZMAT PILLOWS absorb hazardous or unknown liquid leaks too large for a pad. Their large surface area provides fast wicking and shortens clean-up time.

Use them in tight spaces, such as under machines and in cramped corners. ESP offers both HazMat pillows and pillow and pan combinations. Pans help to ensure that saturated pillows do not leak. The pans are reusable.

MB Pillows – YELLOW HAZMAT

SIZE	UNITS/CASE	QTY/PALLET	ITEM #

3. SPILL KITS

EMERGENCY CLEAN-UP

Fast response is key to effective spill clean-up. Spill kits are an important part of any workplace safety program. Keep them handy whether on the move or at work.

ESP HAS A KIT FOR NEARLY EVERY SITUATION.

We offer spill kits stocked with 100% pure poly meltblown in white oil-only, gray universal and yellow HazMat. There is also a complete line of kits stocked with spill products made from natural ColdForm2™ in white oil-only and gray universal.

Our kits are essential tools in helping customers comply with EPA and OSHA requirements. According to these groups, spill kits must be available wherever chemicals are used or stored.

We also have an extensive custom-made spill kit program. Don't hesitate to call us if you don't see what you need.

• custom kits • truck kits • combat kits • overpacks • polydrums • totes

ESP'S CUSTOM KIT PROGRAM

Every work environment is different. A company's location, size, activities, types of chemicals used and personnel all affect the type of spill kit required. For that reason, ESP offers one of the most flexible and extensive custom spill kit programs in North America.

We can build spill kits of any size for any situation or location. Give us your specifications and we'll customize kits to suit your needs. We can fill the kit with whatever types of products you need. We can also help you decide what might work best in your situation.

To complete this program, we offer custom labels for your kits. You might want to add your company name, logo, part numbers or other information to the label on the front of the kit. Give us a call and we'll discuss the options.

CUSTOMIZATION OPTIONS

PICK THE KIT CONTAINER:

Start by selecting the size and type of container you want to use.

In the following pages you can see the variety of kits we offer:

- vinyl truck kits
- combat kit/duffle bags
- overpacks and polydrums
- large and extra large wheeled totes

CHOOSE THE FIBER TYPE AND APPLICATION:

Choose between 100% poly meltblown or natural ColdForm2™.

Then select sorbent items for your specific application:

- white oil-only
- gray universal
- yellow HazMat

SPECIAL ITEMS ALSO AVAILABLE:

- acid/chemical neutralizer
- HazMat suit
- granular sorbents
- dust pan and brush
- and more

SPILL CLEAN-UP TIPS

A STEP-BY-STEP GUIDE TO SPILL RESPONSE

Safeguard the health and safety of personnel, the environment and workplace by complying with all regulations and workplace spill procedures.

1. Assess the Risk

The first step is to identify the liquid that spilled. This will tell you how serious a threat it poses and what precautions need to be taken. Each ESP spill kit contains a guide on how to identify and clean up spills.

2. Select Appropriate Protective Gear

Gloves and goggles are standard protection for many types of spills. Be sure to protect your hands, eyes and skin. For more aggressive spills, a full HazMat suit may be required. If toxic fumes are present, use a ventilator. ESP spill kits contain goggles and gloves.

Remember: If you can't identify the spilled substance, treat it as highly toxic and unsafe.

3. Contain the Spill

Use ESP absorbent socks found in each spill kit to contain the spill and keep it from spreading or contaminating water sources.

4. Stop the Flow of the Spill

Act quickly and safely to stop the source of spilled material to minimize the impact of the spill.

5. Clean-up the Spill

Carefully and thoroughly clean up the spill using the appropriate sorbents.

6. Dispose and Decontaminate

Dispose of all used sorbents and other contaminated materials according to company standards, as well as all local, state and federal regulations. If necessary, decontaminate the site, personnel and equipment.

7. Prepare the Necessary Reports

Complete all required notifications and reports regarding the spill as mandated by the company, as well as all local, state and federal regulators.

BATTERY ACID AND TRUCK SPILL KITS are very portable and compact, making them ideal to tackle small spills. Battery acid spill kits can be customized for any size.

5-GALLON BATTERY ACID SPILL KITS

ESP offers these kits in 5-gallon sizes but will customize them to any size. Keep them on hand in battery back-up stations, cell towers, electric forklift shops, loading docks, hospitals, universities, office buildings and transport industries. They are packaged 1 kit per case.

KIT CONTENTS

- acid/base neutralizers
- 15 pads
- 3 - 3" x 4' socks
- 1 Tyvek HazMat suit
- 1 pair of gloves
- 1 pair of goggles
- 1 temporary disposal bag

MELTBLOWN

TRUCK KITS/VINYL ZIPPER BAGS

These compact zipper bags fit easily behind truck seats or in the toolbox. Covered in water-resistant vinyl, they work well in outdoor situations. At construction sites or in off-road applications, their light weight and size make them particularly handy. They are packaged 4 kits per case.

KIT CONTENTS

- 25 pads
- 4 - 3" x 4' socks
- 1 pair of gloves
- 1 temporary disposal bag

COMBAT KITS are mobile and easily stowable. Carry them with you in the truck or store them in closets and around the plant. These spill bags can go anywhere and are ideal for maneuvering in tight spaces.

ESP COMBAT KITS FEATURE:

- a durable and flexible nylon bag
- large label to identify usage – Oil-only, Universal or HazMat
- end zipper pocket for more storage
- heavy-duty velcro strap and handles
- bag handles that convert easily to shoulder straps

COMBAT KIT – 5 GALLON

4. BOOMS AND SOCKS

CLEANING UP LARGER SPILLS

ESP has redefined the standards for high-performance booms, socks and sweeps. We offer a range of these products to tackle workplace spills and to protect the environment both on land and at sea.

BOOMS – MARINE, BILGE AND LAND

ESP's unique booms have proven themselves to be exceptionally strong performers. Their remarkable strength has made them a key player in the Gulf oil spill clean-up. Workers have found that ESP's booms – unlike other similar products – are far stronger and do not fall apart as do industry-standard sock-and-net booms.

Our new all-in-one construction, which stitches the sock and net together, is combined with a strong, tightly affixed rope aligned along one side so it won't twist when pulled. This stronger construction allows the booms to stretch without failing. This has made these products a leader in the Gulf oil spill clean-up.

BOOMS – MARINE, LAND AND BILGE

On land or water, absorbent booms are the ideal solution to containing large spills. Quick placement of booms keeps oil and chemical spills from polluting the environment, and entering drains and our water supply system.

ESP's booms are non-linting and come complete with rust-proof end rings, snaps and a sturdy rope running their length. They connect easily to create the required length.

All of our booms:

- contain a mixture of high-quality fibers designed to maximize absorbency
- are more absorbent than most similarly sized booms
- contain proprietary chemistry to increase absorbency
- have new all-in-one construction, which prevents netting from snagging on debris, a problem for regular sock-net booms

• booms • socks • sweeps

WHY ESP'S NEW BOOMS ARE EXTRA TOUGH:

- all-in-one construction protects filling and delivers superior strength
- highly absorbent fill resists water absorption and stays afloat
- carefully secured rope runs along one side only to prevent twisting
- one-piece sock cover and net prevents booms from snagging on debris
- extra strength and absorbency ensures they won't fail even when fully saturated

OIL-ONLY MARINE BOOMS are the first choice for oil-spill containment on water or outdoors when you do not want to absorb water. ESP's new booms have undergone a significant construction upgrade that makes them far stronger than comparable products.

The industry standard sock-in-net construction has been replaced with our new all-in-one technique. Now the net is affixed to the sock covering, resulting in exceptional strength and improved resistance to snagging. The booms contain a special mix of materials to help them stay afloat, even when they are fully saturated.

Marine Booms – WHITE OIL-ONLY

FORMAT	SIZE	UNITS/CASE	QTY/PALLET	ITEM #
Boom	5" x 10' (13 cm x 3 m)	4	20	4WBOOM510
Boom	5" x 20' (13 cm x 6 m)	2	20	2WBOOM520
Boom	8" x 10' (20 cm x 3 m)	4	12	4WBOOM810
Boom	8" x 20' (20 cm x 6 m)	2	12	2WBOOM820
Boom	5" x 10' (13 cm x 3 m)	4	20	4WBOOM510Euro
Boom	8" x 10' (20 cm x 3 m)	4	12	4WBOOM810Euro

OIL-ONLY BILGE BOOMS are designed for use in bilge and sump situations. These "mini" booms are also made with ESP's new extra strong all-in-one construction. A cord is securely attached to the end to make placement and removal easy, even in tight or awkward places. They are great for outdoor applications because they will not absorb water.

Bilge Booms– WHITE OIL-ONLY

FORMAT	SIZE	UNITS/CASE	QTY/PALLET	ITEM #
Bilge Boom	5" x 18" (13 cm x 46 cm)	20	24	20WBOOM518
Bilge Boom	8" x 18" (20 cm x 46 cm)	10	24	10WBOOM818

BOOMS – LAND

UNIVERSAL LAND BOOMS are an effective way to contain chemical and other water-based spills on land where you do not need the boom to float. They help contain and absorb most types of spills, including water- and oil-based liquids.

These universal booms are also useful in the workplace for maintenance and clean-up tasks that require containment of fluids. Rust-

resistant clips and rings on each boom make it quick and easy to create the desired length.

Land Booms – GRAY UNIVERSAL

FORMAT	SIZE	UNITS/CASE	QTY/PALLET	ITEM #
Boom	5" x 10' (13 cm x 3 m)	4	20	4GBOOM510
Boom	8" x 10' (20 cm x 3 m)	4	12	4GBOOM810

SOCKS – COLDFORM2™ XTRA

COLDFORM2™ XTRA SOCKS set a new standard in oil-only and universal sock. Thicker and more absorbent than most other socks, they are wrapped in a tough ColdForm2™ cover, making them very strong.

The ColdForm2™ absorbent filling is made from a mixture of high-performance fibers. These socks wrap around tight turns and are also very durable.

The Xtra white oil-only socks are as effective in resisting water absorption as they are in absorbing oil. They are flexible enough to wrap easily around oil-leaking equipment.

Select the Xtra gray universal socks when you need a high-performance general purpose maintenance sock. They absorb both oil- and water-based liquids and are also very flexible.

CF2 Xtra – WHITE OIL-ONLY

Socks	3" x 16' (8 cm x 5 m)	8	20	8CFXGS316

SOCKS – POLY AND CELLULOSE

POLY-CELLULOSE SOCKS in oil-only and universal contain a mix of high-performance fibers. The fibers are surrounded by a knit polyester sleeve flexible enough to allow the sock to wrap easily around corners. Our full line of socks have knitted sleeves.

See our HazMat section for yellow socks.
NOTE: We also carry universal corncob socks, which are a good replacement for clay-based granular socks. They are highly absorbent and incinerate to a low ash content.

SWEEPS

WHITE OIL-ONLY SWEEPS are ideal for removing the final oil sheen on a spill, including marine clean-up situations. Sweeps are constructed from a heavy layer of meltblown polypropylene that is ultrasonically welded to a layer of white spun-bond fabric.

At 100 feet long, they are designed to "sweep" across streams and storm-water discharge tubes, as well as to be towed behind a boat.

5. MATS, DRUM TOPS AND MORE

DURABLE MATS AND SPECIALTY ITEMS

ESP builds its high-tech sorbent expertise into its rail mats, poly-backed needle punch, drum tops and pillows. We also carry high-traffic mats and granular sorbents to round out our product offering.

RAIL MATS

OIL-ONLY RAIL MATS are manufactured by ESP. Using our own technologies, we are able to add extra durability and absorbency. This results in a higher performance product than most similar competing products.

This tough and very durable railroad mat offers a heavy-duty, oil-only absorbent barrier to protect railway yards and other transportation facilities from oil leaks.

These mats are constructed using three layers bonded together. The top layer is black UV stabilized needle punch. The middle layer is composed of white oil-only meltblown or white oil-only ColdForm2™. The base consists of a heavy white plastic layer that prevents oil spills from leaking through into the ground.

The entire laminate is then needle punched, which guarantees an even release of rainwater through the fabric while trapping oils.

• rail mats • high-traffic mats • drum tops • pillows • granular sorbents

ESP MANUFACTURES RAIL MATS OFFERING:

- built-in durability
- optimization for higher absorbency
- better performance than most competing rail mats
- a choice of either oil-only meltblown or oil-only ColdForm2™
- custom sizes

NEEDLE PUNCH AND POLY-BACKED NEEDLE PUNCH

NEEDLE PUNCH PADS AND ROLLS

These universal needle punch pads and rolls are constructed from a single layer of synthetic fibers that are then heavily needle punched and heat set. Extremely tough, these needle punch pads and rolls are tough enough to withstand forklift and foot traffic.

Its dark-gray color hides dirt much longer than the standard black needle punch products currently available, allowing these rugs to stay on the job longer.

POLY-BACKED NEEDLE PUNCH ROLLS

Manufactured by ESP, these universal poly-backed needle punch rolls offer a low-slip backing that helps keep floors and surfaces clean and dry. Also very strong and durable, these rolls withstand high traffic, including forklifts.

Needle Punch – UNIVERSAL Heavy Weight

RAG RUGS

UNIVERSAL RAG RUG is made from recycled fibers. Pound-for-pound and dollar-for-dollar, it offers one of the most absorbent products anywhere. It is

constructed from a single layer of natural and synthetic fibers that is then carefully needle-punched and heat-set.

Rag rug is available in pads as well as full and split rolls all in heavy weight.

DRUM TOPS – COLDFORM2™ FINE FIBER

COLDFORM2™ DRUM TOPS have a ColdForm2™ core covered with a top and bottom fine-fiber layer.

Our unique new SpillLock™ technology is added to the gray universal drum tops.

This makes the drum tops an even more absorbent product.

Pre-cut to fit a 55-gallon drum, each one has breather holes die cut to fit perfectly around the vent and bung fittings on

standard 55-gallon drums. These highly absorbent ColdForm2™ sorbent covers eliminate the mess that results from accessing liquids from drums.

PILLOWS, DRIP PANS AND CRUMBLE DRIP PANS

PILLOWS are used to absorb leaks too large for a pad. These multi-purpose items are ideal for plant maintenance. Their large surface area provides fast wicking and shortens clean-up time. Use them in tight spaces, such as under machines and leaky hydraulic hoses, and in cramped corners.

DRIP PANS are a great method for containing larger quantities of liquids. The oil-only pans have drains for water so that only oil-based liquids are captured. Universal pans do not have drains. These drip pans allow for the replacement of the pillow, unlike the crumble pans. Replacement pillows are sold separately.

CRUMBLE DRIP PANS contain particulate instead of a pillow. The all-in-one covered pan prevents any direct contact with the saturated sorbents inside. Once the pan is saturated, there is no need to handle a soaked pillow. Simply dispose of the whole item.

NET BAG PILLOWS

OIL-ONLY NET BAG PILLOWS, sometimes called onion-sack pillows, contain chopped poly sorbents. They are great for placing in hard-to-reach places, such as deep sump holes.

Simply toss these sorbent bags into the hole or other awkward space. Then when it comes time to replace them, just hook onto the looped handles at one end of the bag to

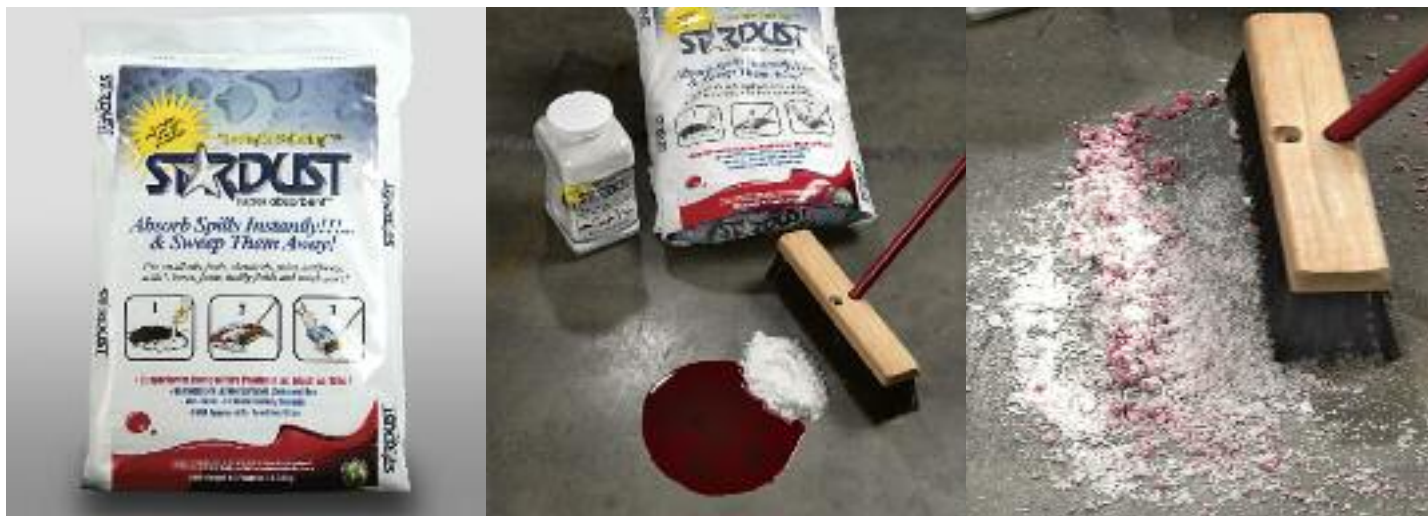

remove it. They are also flexible enough to shape themselves easily into tight spaces.

GRANULAR SORBENTS

STARDUST SUPER ABSORBENT™ has virtually unlimited uses. It instantly absorbs all types of spills, as well as liquids of any viscosity, leaving surfaces clean and dry. Simply sprinkle this dry absorbent onto the spill, use a broom to push the product into

the liquid, then watch as it completely absorbs the spill. The liquid is turned into a solid. Just sweep it away.

Stardust will not harm people, plants, animals or surfaces including concrete, tile or asphalt. It contains no reactive chemicals

and is approved for use in food processing facilities.

This light-weight product makes clean-up quick and also costs less to dispose of than other heavier granular products.

PARTICULATE – MELTBLOWN

MELTBLOWN PARTICULATE is a versatile sorbent. Our loose 100% pure polypropylene particulate is ideal for retrieving viscous oils

and can be spread over large areas on both land and water. The white oil-only repels water and will float. Use the universal for

easy clean-up of both oil- and water-based spills. This product also serves as an excellent packing material.

6. SECONDARY CONTAINMENT

PROTECTION AND SPILL STORAGE

Secondary containment items protect against leaks from your initial spill containers. Here is a sampling of products we carry to help meet environmental regulations. Call us if you need something not shown here.

DRAIN SEALS protect storm drains and catch basins. They prevent oil, sediment and other contaminants from flowing into drains and sewers.

FORMAT	SIZE	UNITS/CASE	ITEM #
Drain Seal	18" x 18" (46 cm x 46 cm)	1	2126
Drain Seal	24" x 24" (61 cm x 61 cm)	1	2127
Drain Seal	36" x 36" (91 cm x 91 cm)	1	2130
Drain Seal	48" x 48" (122 cm x 122 cm)	1	2132
Drain Seal	Round 30" (76 cm)	1	2136

POP-UP POOLS, made from 100% polyethylene to resist aggressive chemicals, expand to capture leaks from saddle tanks, pipes, hydraulic lines and many other industrial incidents. A foam ring rises with the level of liquid to raise the sidewalls. Compact when folded, they store easily inside spill kits.

FORMAT	WEIGHT	SIZE	UNITS/CASE	ITEM #
Prowler Pop-up Pool	2 lb. (0.9 kg)	28" x 13" x 18" (71 cm x 33 cm x 46 cm)	1	5966-YE
Pop-up Pool		100 gal (378 L)	1	8102
Pop-up Pool		150 gal (568 L)	1	8153

SPILL BERMS contain or redirect spills away from sensitive areas. The non-absorbing urethane material is reusable and chemically resistant. These flexible spill berms will form almost any shape while temporarily bonding to any smooth surface. They are available in 10-foot lengths and are ideal for most applications. A low-profile version is also available.

FORMAT	WEIGHT	SIZE	UNITS/CASE	ITEM #
Dripillow™ Berm	9 lb. (4 kg)	38" x 42" x 3" (96 x 107 x 8 cm)	1	5680-YE
Dripillow Berm Replacement XL		38" x 42" x 3" (96 x 107 x 8 cm)	1	5685-WH
Spill Berm 10'	31 lb. (14 kg)	10" x 4" x 2.25" (25 x 10 x 6 cm)	1	2100
Spill Berm 10' Black	31 lb. (14 kg)	10" x 4" x 2.25" (25 x 10 x 6 cm)	1	2050
Spill Berm Connector		90' (229 cm) Y Black Connector	1	2101
Spill Berm Carrying Case			1	2104

- drain seals • pop-up pools • spill berms • spill pallets • storm sentinels

SPILL PALLETS are economical, all-polyethylene pallets available in 2- and 4-drum models. Each features a 66-gallon containment capacity and meets EPA and Uniform Fire Code Spill Containment Regulations. Their black color helps hide dirt and grime. The pallets' removable polyethylene grates allow for convenient cleaning.

FORMAT	WEIGHT	SIZE	UNITS/CASE	ITEM #
Inline Spill Pallet	80 lb. (36 kg)	98" x 22.25" x 12" (249 cm x 56 cm x 30 cm)	1	5102-YE
2 Drum w Drain	63 lb. (28 kg)	53.5" x 29" x 17" (136 cm x 74 cm x 43 cm)	1	5253-YE-D
2 Drum	63 lb. (28 kg)	53.5" x 29" x 17" (136 cm x 74 cm x 43 cm)	1	5253-YE
4 Drum Slimline	91 lb. (41 kg)	54" x 54" x 12" (137 cm x 137 cm x 30 cm)	1	5400-YE
4 Drum Slimline w Drain	91 lb. (41 kg)	54" x 54" x 12" (137 cm x 137 cm x 30 cm)	1	5400-YE-D

STORM SENTINELS protect storm drains and catch basins. They keep oil, sediment and other contaminants from flowing into drains and sewers.

FORMAT	WEIGHT	SIZE	UNITS/CASE	ITEM #
Rectangular Storm Sentinel	2 lb. (0.9 kg)	16" x 20" to 28" x 36" (41 cm x 51 cm to 71 cm x 91 cm)	1	1341

NOTE: For secondary containment items not listed here, please contact ESP.

WE STAND BEHIND OUR PRODUCTS

WARRANTY

We Guarantee Our Products:

At Evolution Sorbent Products (ESP), we warrant our products according to the terms and conditions stated in our sales contracts.

DISCLAIMER

Limited Liability:

Evolution Sorbent Products's liability shall not be subject to any other obligations or liabilities arising out of breach of contract, warrant, tort (including negligence and strict liability) or other theories of law with respect to products sold by ESP or any undertakings, acts or omissions relating thereto. ESP shall not be liable for and disclaims all consequential, incidental and contingent damages whatsoever. The remedies set out herein are exclusive.

COMPLIANCE

Comply with All Handling, Storage and Disposal Regulations:

When it comes to handling, storing and disposing of these products, you must comply with all local, state and federal regulations. Various fluids absorbed may be hazardous or toxic; therefore, be sure to dispose of them according to the relevant regulations.

CAUTION

Flammable and Hazardous Fluids Still Need Caution When Absorbed:

Remember that flammable and other hazardous liquids absorbed by various sorbent materials are still unsafe. They can, under certain conditions, spontaneously ignite. Ensure that all personnel handling these materials do so with caution and that they always wear protective clothing, as well as respiratory devices when required.
